

## **New Billing Charge Classes**

Introducing new charge classes so 3PL billing customers can accurately bill according to their needs.

### **Charge class:**

#### **PerReceiptContainerCharge| ChargePerPiece**

This new charge class allows users to create charge types and bill flat rate based on no. of pieces they enter in receiving/put away.

Rate Variable: Rate

Non-Rate Variable: N/A

### **Charge class:**

#### **PerReceiptContainerCharge| ChargePerQty**

This new charge class allows users to create charge types and bill flat rate based on how much qty was received on the container.

Rate Variable: Rate

Non-Rate Variable: N/A

### **Charge class:**

#### **PerShipment | ShippingCostMarkupByXPerC**

This new charge class allows users to create charge types that set a % markup on shipping cost and have that % applied in addition to the shipping cost.

Rate Variable: N/A

Non-Rate Variable: % Markup Value

### **Charge class:**

#### **PerShipmentDetailAsmExp | ChargePerQty**

This new charge class allows users to create charge types and bill flat rate bases on quantity on exploded item assemblies.

Rate Variable: Rate

Non-Rate Variable: N/A
