

Binary Operators in Allocation Assignment Master

The binary operator column has been added to the Allocation Assignment Master, this will let users select ‘AND’ or ‘OR’ operators when creating allocation criteria to ensure the correct allocation rule is applied when shipment imports.

***	(customer_code = 566)	
***	OR (warehouse_id = ANTRIM)	
***	AND (shipment_number = EXAMPLE1)	

New Columns added to Selection Class: Shipment Detail

The columns outlined in the image below have been added to Shipment Detail Selection. These have been added to allow even greater control over your selection by letting you define criteria from the shipment header.

`shipment_header.total_quantity`
`shipment_header.total_details`
`shipment_header.min_item_category`
`shipment_header.max_item_category`
`shipment_header.custom_field_1`
`shipment_header.custom_field_2`
`shipment_header.entry_number`
`shipment_header.total_sale_value`
